- Executed 1000+ test cases, Reported 456+ defects.

### KEY ACHIEVEMENTS:

- Successfully validated 500+ website pages and product listings.
- Reduced content-related production issues through detailed QA checks.
- Improved website quality by identifying critical UI and functional defects before release.

## PROJECTS:

### Motorola Website Testing & Content Validation

#### Project Description:

Worked on testing and maintaining an online shopping platform that handled product listings, promotional campaigns, category pages, and customer-facing web content.

#### Responsibilities:

- Validated website functionality and content accuracy.
- Tested navigation, forms, search functionality, and checkout workflows.
- Performed UI and responsive testing.
- Reported and tracked defects until closure.
- Ensured product information accuracy across multiple pages.

### Automated Resume Analysis and Skill Suggesting Website Using NLP    Aug 2024 – Jan 2024

I built a web application that reads resumes and uses smart text analysis to suggest skills a job seeker might need. I used Python to create the backend system that extracts skills from uploaded PDF and Word documents. To make the platform user-friendly, I designed and styled a clean interface using HTML and CSS that clearly shows users their missing skills.

## Education

---

### Anurag Engineering College

Dec 2020 - May 2024

#### B-Tech

A strong computer science foundation in Python, C, and HTML/CSS

### Sri Chaitanya Jr College

Jun 2018 - Apr 2020

#### Intermediate (MPC)

I built a strong analytical and logical foundation. The intensive curriculum focused heavily on mathematics and sciences, which naturally developed my structured approach to problem-solving

### Sri Chaitanya Techno Curriculum

Jun 2017 - Apr 2018

#### SSC

I built my core academic foundation, focusing heavily on mathematics, science, and computer fundamentals. This early training introduced me to structured logical thinking and the scientific approach to problem-solving.

## ACHIEVEMENTS

- Identified critical defects before production deployment, reducing post-release issues.
  - Consistently met sprint testing deadlines while maintaining high test coverage.
-
